Website UI Redesign - Task 2

Student: Rayan Hobballah

Project: E-commerce Website Redesign (SHOP.CO)

Continuation of Task 1 - Mobile App Wireframing

Due Date: 06 Oct 2026

Key Features Delivered:

- Heuristic Evaluation of existing e-commerce site
- Mood Board & Style Guide
- High-Fidelity Mockups (Desktop)
- Responsive Layout (Mobile)
- Improved Visual Hierarchy & Usability

1. Heuristic Evaluation (Usability Issues)

Evaluated existing generic e-commerce site (Old SHOP):

1. Visibility of System Status - Issue: No cart count, no loading indicator. Users don't know if item added.
   Fix: Added cart badge with count (2), clear Add to Cart feedback with green button.

2. Consistency & Standards - Issue: Different button colors/styles on each page, confusing navigation.
   Fix: Unified design system - Primary green #2ECC71, Secondary black #000000.

3. Aesthetic & Minimalist Design - Issue: Cluttered homepage, too many banners, no white space.
   Fix: Clean minimal layout, 12-column grid, 24px gutter, ample white space, product focus.

4. Error Prevention - Issue: No size guide, user buys wrong size -> returns.
   Fix: Added Size Guide link, size selector XS-XL with clear selected state (M black).

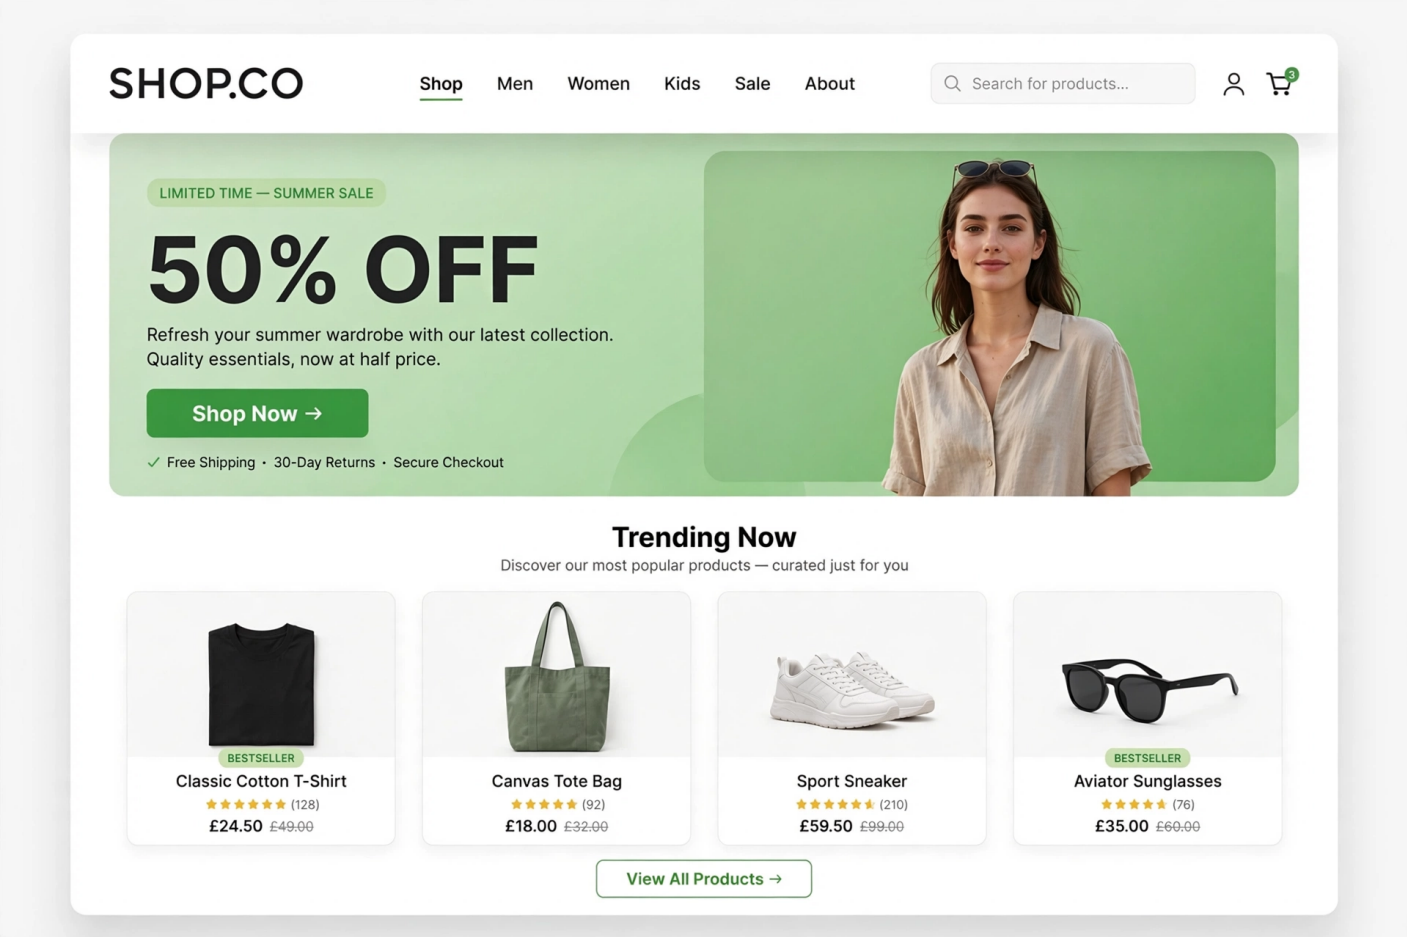

5. Flexibility & Efficiency - Issue: No search filters, hard to find products.
   Fix: Added filters, search icon, categories: Shop, On Sale, New Arrivals, Brands.

6. Help & Documentation - Issue: No info on shipping/returns at product page.
   Fix: Added info: 'Free shipping over $50' and '30-day returns & exchanges'.

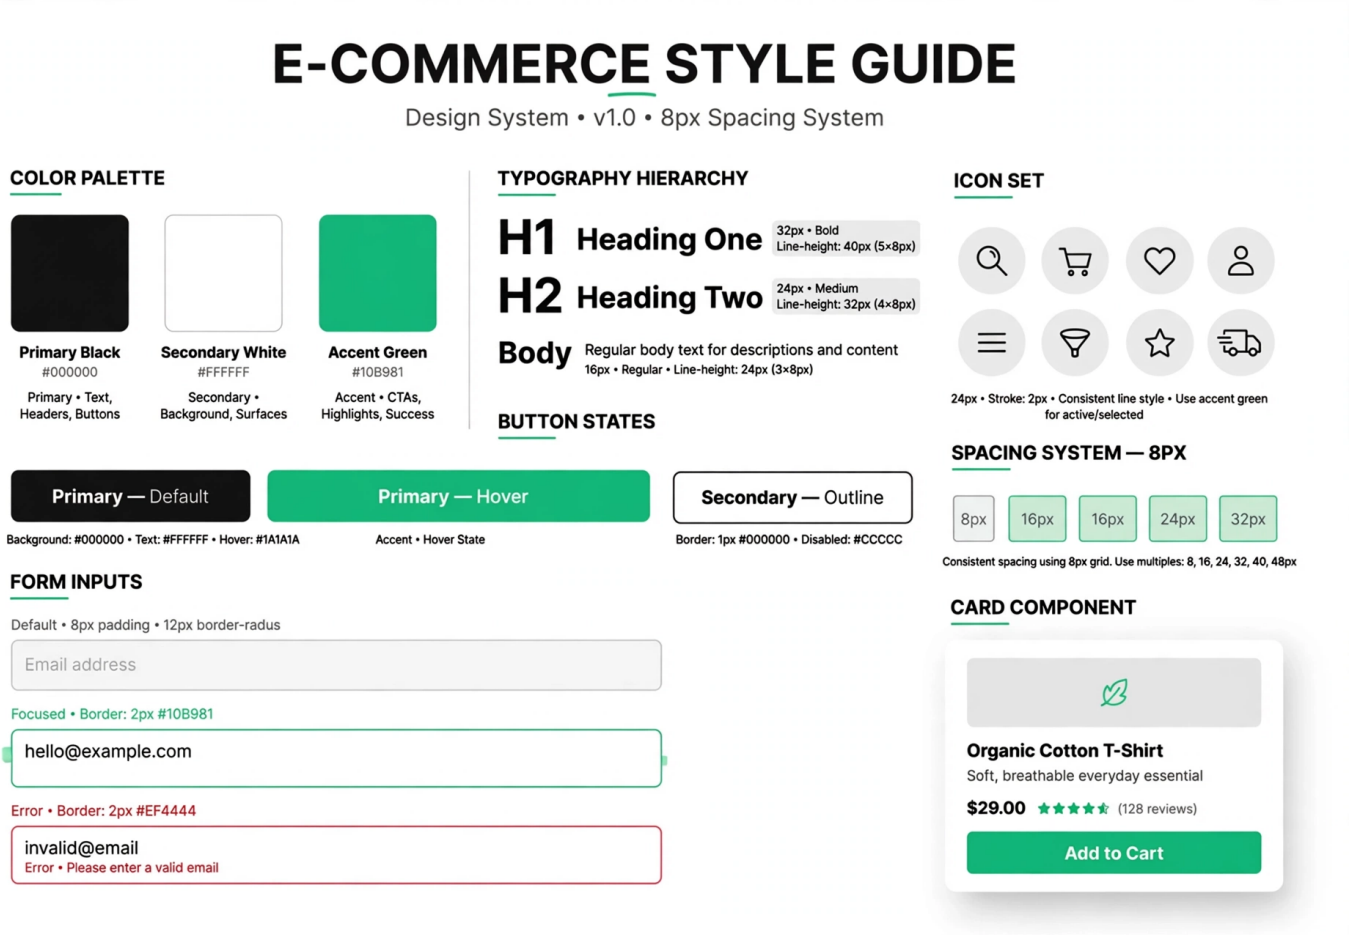

User Persona Reminder: Reem, 22, Student - Needs fast checkout, clear price, discounts visible.

2. Mood Board

Modern Minimal - Clean, Professional, User-Friendly

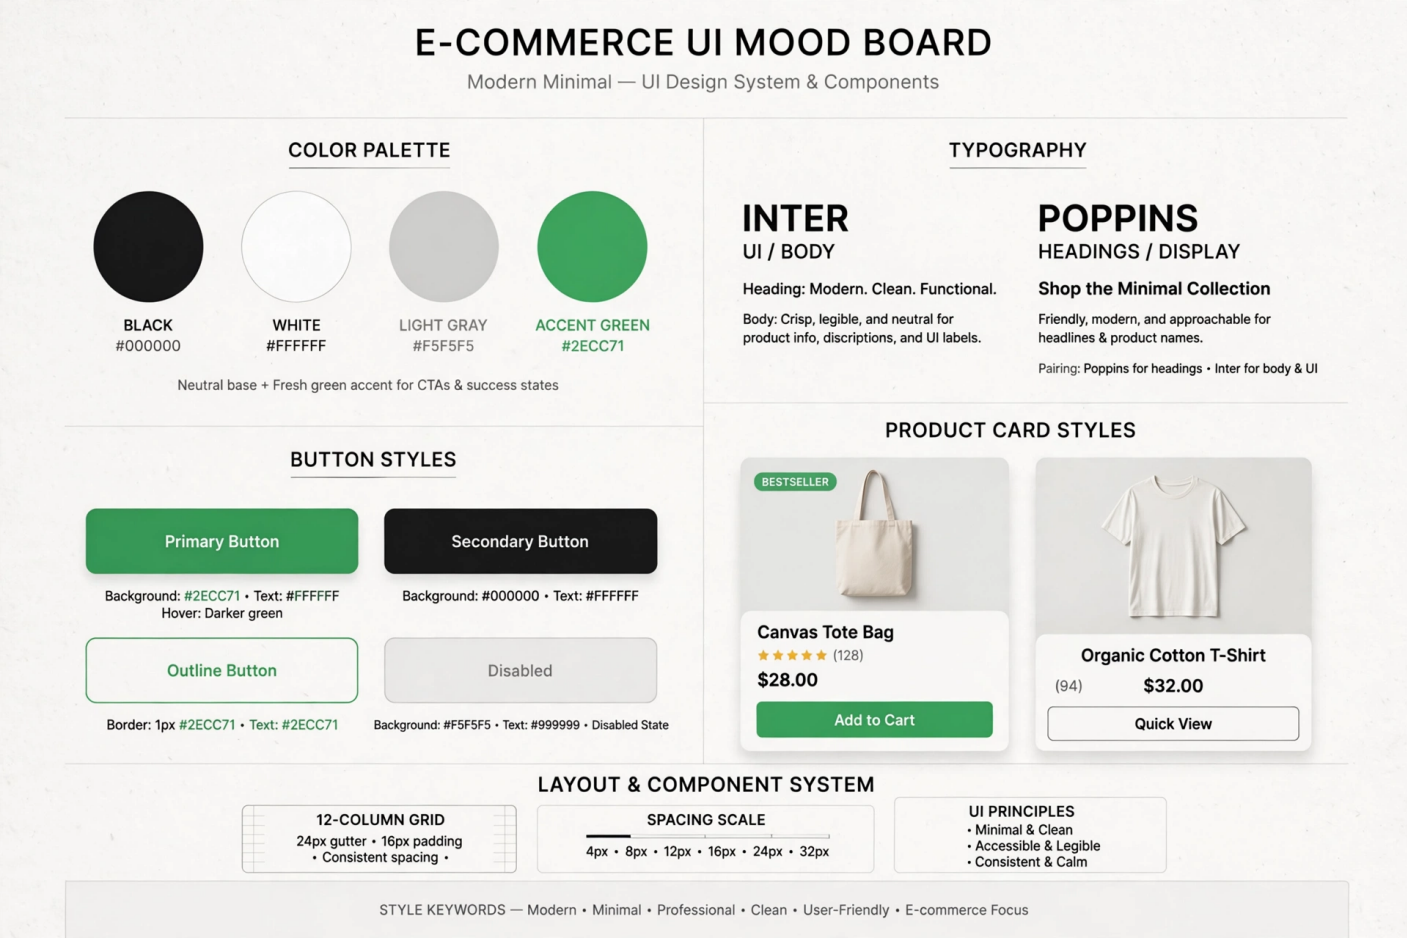

3. Style Guide

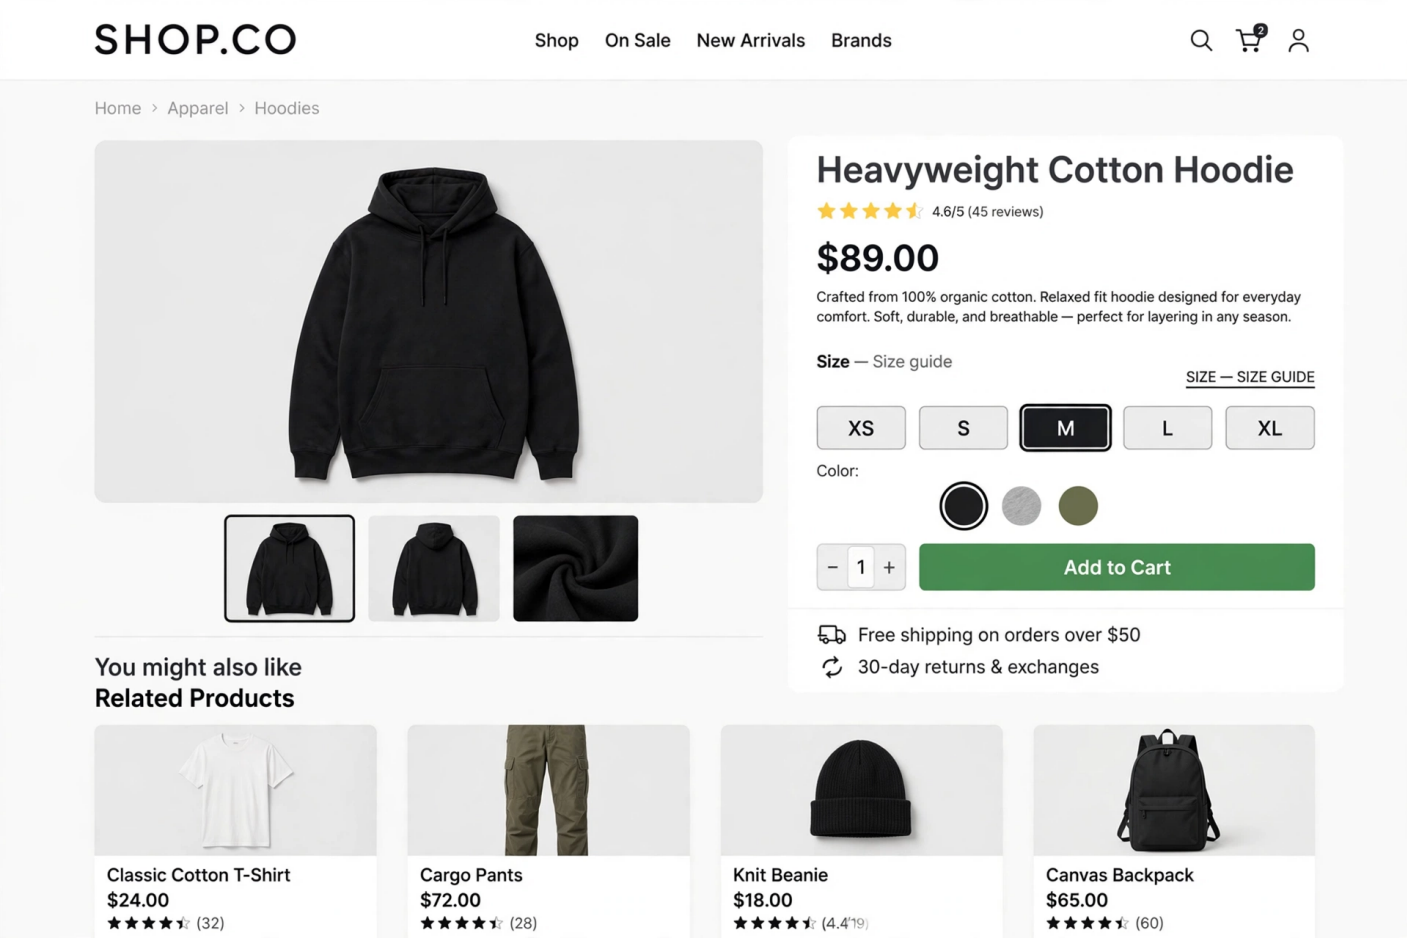

4. High-Fidelity Mockup - Desktop Home

Improved: Clear header SHOP.CO, navigation, hero 50% OFF, product grid 4 cols, visual hierarchy

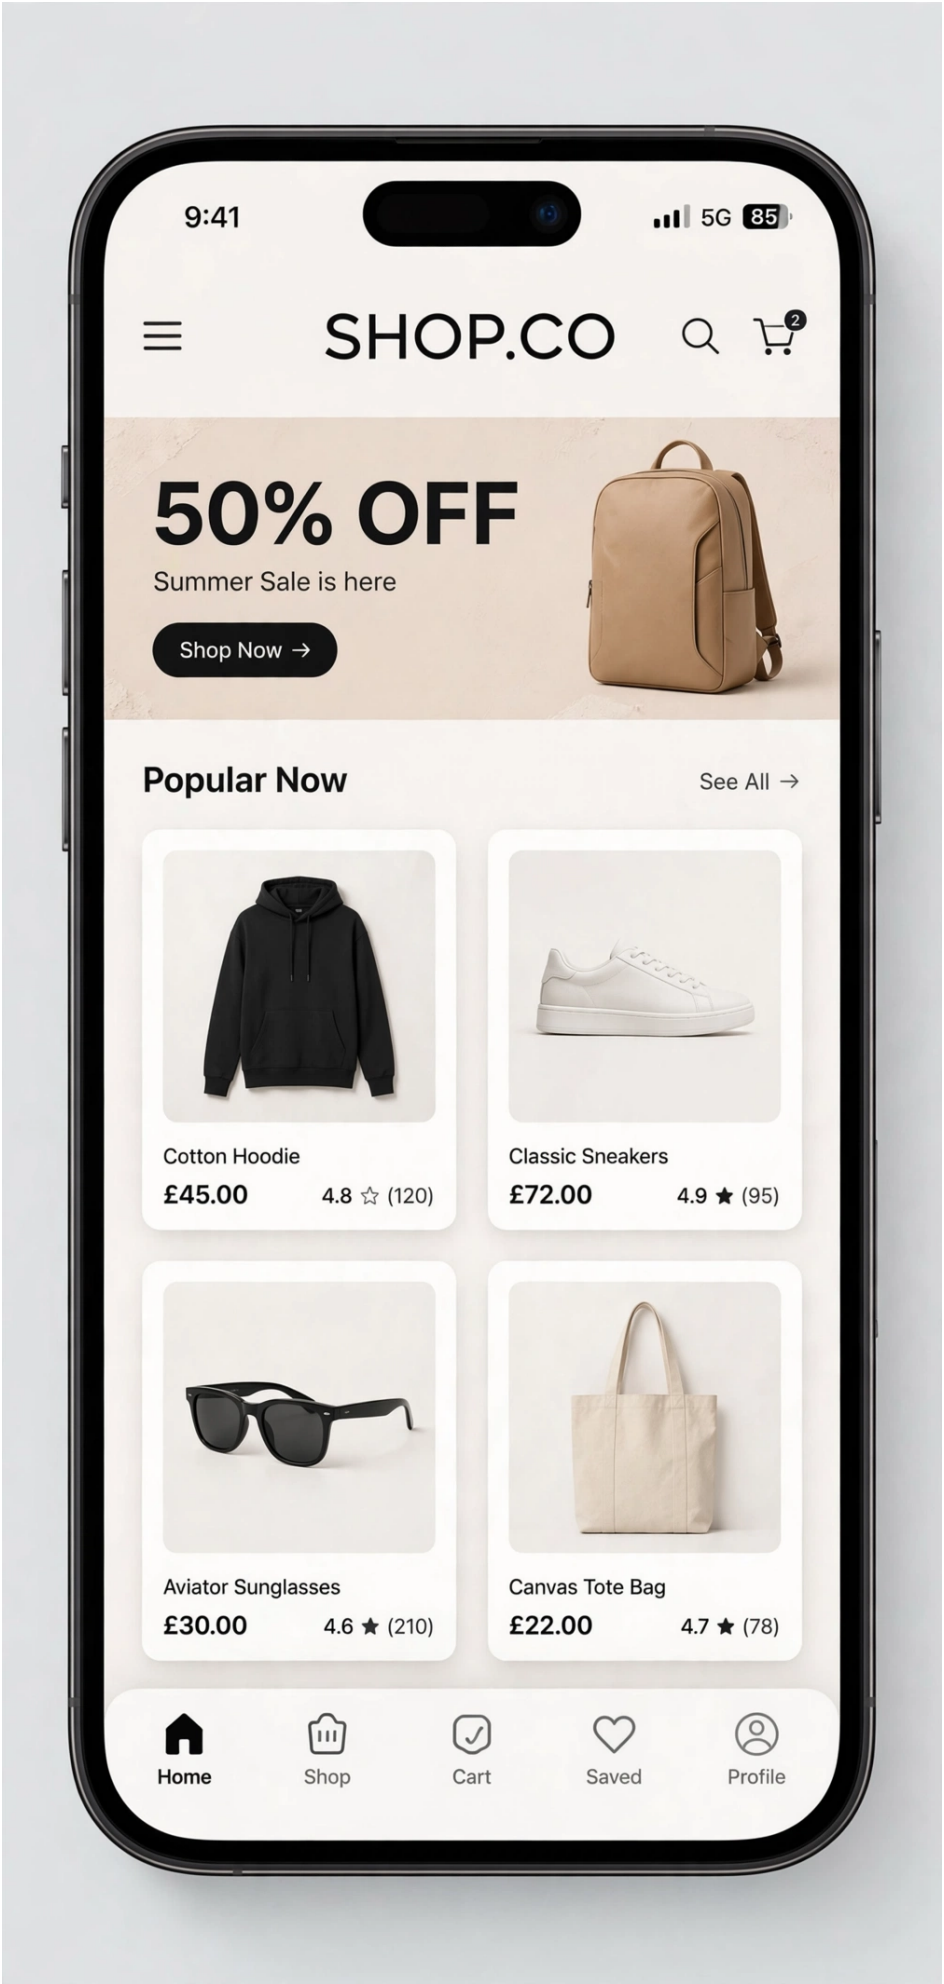

5. High-Fidelity Mockup - Desktop Product Detail

Features: Large image, thumbnails, size/color selector, quantity, green Add to Cart CTA, shipping info, related products

6. Responsive Layout - Mobile Home

Responsive adaptation: Hamburger menu, 2-col grid, bottom nav (Home, Shop, Cart, Saved, Profile), same brand

7. Expected Outcome & Learnings

Visual Hierarchy: Used typography Inter/Poppins, large H1 for price $89, clear CTAs green #2ECC71
Layout Design: 12-column grid, 24px gutter, 16px padding, consistent spacing 4/8/12/16/24/32
Responsive Design: Desktop 1440px -> Mobile 390px breakpoint, hamburger + bottom nav on mobile
Usability Improvements:

- Cart badge visible at all times
- Size guide prevents errors
- Free shipping & returns info builds trust
- Related products 'You might also like' increases discovery
- Consistent button styles improve learnability

Tools Used: Figma (concept), High-fidelity mockups generated
Next Steps: Prototype in Figma, test with 2 users (Reem persona) for checkout flow.

GitHub Submission Ready for Task 2
